AND CHANGE NOTICE 1

January 11, 1994

FEDERAL STANDARD

COLORS USED IN GOVERNMENT PROCUREMENT

Authority. This standard is issued pursuant to the Federal Property and Administrative Services Act of 1949, as amended, and its application to the purchase of commodities referred to herein.

- 1. Scope: This standard presents the colors used by Government Activities in a format suitable for color selection, color matching and for quality control inspection. This document describes the designation and use of the color chips of this standard. Formats for color chip representation and precise color matching formats are as described below:
 - a. Color Chip Representation, Fan Deck: Suitable for color identification and selection.
 - **b.** Color Chip Representation, Color Book: Suitable for color identification, comparison and selection.
 - **c. Precise Color Matching, Individual Color Chips:** A 3 x 5 inch color chip supplied in a 3 x 5 inch protective envelope, suitable for color matching and quality control inspection purposes.
 - **d. Precise Color Matching, Sets of Color Chips:** A set containing one 3 x 5 inch color chip in its protective envelope for each Fed-Std-595 color, suitable for color matching and quality control inspection purposes.

2. Referenced Documents:

American Society for Testing and Materials (ASTM) Standards:

ASTM D523	Standard Test Method for Specular Gloss
ASTM D1729	Standard Practice for Visual Appraisal of Colors and Color Differences
	of Diffusely-Illuminated Opaque Materials
ASTM D2244	Standard Practice for Calculation of Color Tolerances and Color
	Differences from Instrumentally Measured Color Coordinates
ASTM E308	Standard Practice for Computing the Colors of Objects by Using the CIE
	System
CIE 15:2004	Colorimetry, 3 rd edition, NET: www.cie.co.at

3. Definitions: Not applicable

AMSC N/A FSC 8010

4. General Requirements:

- **a.** Color Matching: This standard covers color chips for color matching and control of items produced for Government use. Unless otherwise specified or designated by the contracting officer, color chips shall be the latest in effect by date of contract. Neither the Fan Decks nor the Color Book shall be used for color matching. Tristimulus values are provided as a reference in this standard to supplement the primary color chip reference.
- **b. Metamerism:** Colors that visually match in lights of certain spectral compositions but not in others are said to be metameric. The light source, condition of viewing and specular reflectance are critical to overcome metamerism and to determine correct matches. Therefore, light sources as specified in ASTM D1729 shall be used for visual color matching.
- **c. Color Matching Criteria:** In specifying color, procurement documents should state the Fed-Std-595 color number.

d. Color Chips Authorized for Use:

- i. After the publication of this standard, only color chips marked Fed-Std-595C shall be used.
- ii. Color chips which are soiled, stained, faded, or otherwise damaged due to improper handling, storage, or exposure to light or chemicals shall not be used.
- **e.** Care of Color Chips: All color chips will change with time and some will change more than others. Color change can be minimized by observing the following procedures.
 - i. Store the color chips in a cool dark place.
 - ii. Avoid exposure of the color chips to direct or scattered UV light or chemicals.
 - iii. Minimize exposure of the color chips to light from any source.
 - iv. Keep the color chips covered when not in use.
 - v. Do not touch the face of the color chips.
- f. Color Chip Reproduction: Color chips may not be reproduced without the authorization of General Services Administration. Reproduction of color chips from any source other than the master standard is not authorized. The General Services Administration must approve all color matches made when the color chips are reproduced.

5. Detailed Requirements

- **a. Available Items:** The following items are available to both the Federal Community and commercial customers:
 - i. Fan Deck of representative colors, 0.5 x 2 inch color chips. The National Stock Number for this is 7690-01-162-2210.
 - ii. Fed-Std-595 Color Book, consisting of an 8.5 x 11 inch compilation of the representative color chips, each 0.5 x 1 inch in size. Individual paint colors are arranged in tabs by color family and in each tab, sequentially from light to dark and according to color chip number. These are formatted in three parallel columns corresponding to flat, semigloss and gloss.
 - iii. Individual 3 x 5 inch color reference chips
 - iv. Color set of all 650 3 x 5 inch color reference chips

b. Ordering Information, Commercial Customers: Fan Decks, the Color Book, individual color chips, and sets of color chips are for sale by the General Services Administration at the following address:

GSA Property Management GSA/CO/3QSCB 490 L'Enfant Plaza East S.W. Suite 8214 Washington, D.C. 20407

- **c.** Ordering Information, Government Customers: Individual color chips, Color Book, and sets of color chips are available at the address listed in "b" above. Fan Decks are available via routine supply channels under National Stock Number 7690-01-162-2210.
- **d.** Color Identification: Each color is identified by a five-digit code. Colors in this standard are not to be referenced without giving the five-digit code.
- **e. Current Color Reference System:** There are eight color groups and three gloss designations.
 - i. First number corresponds to the gloss level (See Table 1 below.)
 - ii. Second number corresponds to the color group (See Table 2 below)
 - iii. Last 3 numbers represent that particular color by the sequence added and its relative placement from light to dark.

Table 1, First Digit

First Digit	Finish	Gloss	Level
		Minimum	Maximum
1	Gloss	80	
2	Semi-gloss	30	45
3	Flat		6

Table 2, Second Digit

Second Digit	Color Groups
0	Brown
1	Red
2	Orange
3	Yellow
4	Green
5	Blue
6	Gray
7	Misc (Black, White, Gold, Silver, Violet)
8	Fluorescent

f. Tristimulus, Specular Gloss Values: Unless otherwise noted, tristimulus values referenced in this standard are expressed in Illuminant C or D65 (daylight), Illuminant A (incandescent tungsten lamplight), Illuminant F2 (standard cool white fluorescent lamp) in accordance with ASTM E308 Standard Practice for Computing the Colors of Objects by Using the CIE System. (Reference CIE 1931 2-degree observer using 0° - 45° illumination, Hunter Colorimeter.) 60° Specular Gloss is calculated in accordance with Standard Number ASTM D523, Standard Test Method for Specular Gloss.

6. Notes

a. Color Cross Reference, Safety, Highway and Camouflage Colors: The following colors meet the special requirements for Safety, Highway and Camouflage colors.

Table 3, Safety, Highway and Camouflage Cross Reference

Safety Colors,	Chip Number	Highway	Chip Number	Camouflage	Chip Number

International	12197				
Orange					

Note: The chips for camouflage colors shall be used for general color matching purposes only. The specifications for camouflage coatings contain requirements for infrared reflectance which must be met in addition to color. The color cards (chips) for the camouflage colors will contain pigments chosen for their suitability and compatibility with the color card coating and, therefore, have different infrared reflectance characteristics than those required for camouflage coatings. Merely matching the color chip for color will not be sufficient to assure product acceptance by the contracting activity. For further information, contact for camouflage colors only: U.S. Army Research Laboratory, CARC Commodity Management, ATTN: AMSRD-ARL-WM-MC, Aberdeen Proving Ground, MD 21005-5069.

- b. International Standardization Agreement: Several colors listed in this standard are the subject of international standardization agreement, MAS Army 440, 7 December 1987, NATO STANAG 2321, Edition 4. When there is a change, revision, or cancellation of this standard which will affect or violate the international agreement concerned, the preparing activity will take appropriate reconciliatory action through international standardization channels including departmental standardization office, if required. The following colors are covered by the above agreement:
 - i. Silver/ aluminum 17178
 - ii. Brown 30117 or 30140
 - iii. Red 31136
 - iv. Light Red 31158
 - v. Yellow 33538
 - vi. Light Green 34558 or 34449
 - vii. Dark Green 34108
 - viii. Light Blue 35109
 - ix. Gray 26231
 - x. Black 37038
 - xi. Violet 37100
 - xii. White 37875

- II New Colors Added in 2007
- III CIELAB Values for Select Colors
- IV Master Color List
- V Notes

Appendix I - Pigments Used in Fed-Std-595C Master Standard

The following list of pigments is provided for information only.

It is a list of generic names of the primary pigments used in the coating of the standard color chip to be matched. The color chip coating may contain other pigments used in making the final color match.

By providing this list, the Government makes no representation, ether explicit or implied that these pigments must be used in the products to be provided. Neither does the provision of this list imply that the standard color chip can be matched using any source of the listed pigments and any vehicle, that a proposed match using these pigments will be accepted, or that a proposed color match using different pigments will be rejected solely because of this listing.

Materials furnished under contracts referencing a FED-STD-595 color must conform to all of the requirements of the product specification. Any conflicts between contract requirements and this pigment listing are to be resolved in favor of the contract requirements.

Proposed color matches will be accepted or rejected based solely on the color matching criteria stated in the contract referencing the Fed-Std-595 color number.

Table 4: LIST OF PIGMENTS USED IN COLOR CHIPS OF STANDARD COLORS

Code	Pigment	Code	Pigment
1	Rutile Titanium Dioxide	21	Fast Diarylide Yellow
2	Lamp Black	22	Quinacridone Red
4	Yellow Iron Oxide	23	Brown Iron Oxide
5	Monoazo Red (Yellow Shade)	24	Natural Burnt Umber
6	Phthalocyanine Blue (Red Shade)	25	Green Chrome Oxide
7	Benzimidazolone Yellow	26	Chrome Yellow Primrose
8	Phthalocyanine Blue (Green Shade)	27	Chrome Yellow Med. (Red Shade)
9	Red Iron Oxide (Blue Shade)	31	Phthalocyanine Green (Yellow
			Shade)
10	Quinacridone Violet	39	Carbon Black (Blue Shade)
11	Phthalocyanine Green (Blue Shade)	41	Green Fluorescent
12	Perylene Vermillion	42	Orange Fluorescent
13	Natural Raw Umber	43	Fire Orange Fluorescent
14	Quinacridone Magenta Y	44	Red Fluorescent
15	Molybdate Orange (Red Shade)	45	Yellow Fluorescent
16	Naphthalene Tetracarboxylic Acid	46	Fine Aluminum Paste
18	Carbazole Violet	47	Fine Yellow Metallic

FED-STD-595C

Appendix V - Notes

Detail	ed Notes
1	Gloss: BYK Gardner micro-TRI-gloss model 4528 gloss meter in accordance with ASTM D523; Color: Gretag-Macbeth Color-Eye model 7000A spectrophotometer in accordance with ASTM E308 and ASTM E1348, using hemispherical 8° geometry with spectral component included using integrated sphere instead of 0/45 geometry. Air Force Coating Technology Integration Office, AFRL/MLSSO
2	ASTM E308 standard 2° observer, Army Research Lab
3	D65, A and F2 lighting measured in accordance with ASTM E308 standard 2° observer. 60° gloss calculations in accordance with ASTM D523. Natick Soldier Center, Natick MA
4	Hawker Beechcraft Aircraft Company
5	Only Hunter and CIELAB values available. Deft, 99-GY-070 Lockheed Martin F-35
6	Only Hunter and CIELAB values available. Deft Color Panel; Naval Air Systems Command, Lakehurst NJ
7	Illuminant A represents incandescent lamplight with an approximate color temperature of 2854 degrees Kelvin; Illuminant C represents light from an overcast sky with a correlated color temperature of approximately 6770 degrees Kelvin; Illuminant D65 represents daylight with a correlated color temperature of approximately 6500 degrees Kelvin; Illuminant F2 represents light emanating from a cool white fluorescent source.
8	These tristimulus values were determined in accordance with ASTM E308 and calculated for the CIE 1931 2-degree observer using 0 degree to 45 degree illumination. The equipment used for the measurements was the Hunter Colorimeter Labscan LS 5100. Color of part of original 1989, 1994 standard.
